

The Information System Is Not Neutral

Twelve findings every informed citizen should know

Truth is justice. Fred Check was born to uphold it — boldly, fairly, and without exception. Fred is not anti-Israel, anti-West, or anti-anyone. Fred is pro-evidence, consistently. What follows are twelve documented findings about the information systems that shape what most of the world believes.

I HISTORICAL CONDITIONING Radio (1920s) and television (1930s-50s) gave governments and corporations the power to shape public belief at scale. The Cold War built a propaganda infrastructure — including CIA infiltration of major US newsrooms (Operation Mockingbird, confirmed 1975) — that was never dismantled. It was absorbed into professional culture.	II MANUFACTURING CONSENT Chomsky and Herman's 1988 analysis documented how mainstream media systematically serves the interests of power through ownership, advertising, and official sourcing — without requiring any conscious conspiracy. The filters are structural, not deliberate.
III PRO-ISRAELI BIAS IS DOCUMENTED BBC, Reuters, CNN, and the New York Times apply asymmetric language to Israeli and Palestinian casualties. AIPAC, CAMERA, and the Canary Mission systematically influence media coverage. The ICJ ruled genocide in Gaza "plausible." Amnesty and Human Rights Watch use the word "apartheid." Most Western outlets do not.	IV ANTISEMITISM IS WEAPONISED TO SILENCE DEBATE It is not antisemitic to criticise the Israeli government, to call military actions war crimes when the UN does, or to use the word apartheid when Amnesty does. The IHRA definition has been used to end careers, defund organisations, and shut down conferences. This protects a government, not a people.
V ISLAMOPHOBIA IS A MEDIA PRODUCT Cardiff University found the majority of BBC coverage of British Muslims focuses on terrorism. A 2017 study found attacks by Muslim perpetrators received 357% more coverage than equivalent attacks by others. The War on Terror framework — adopted wholesale by Western media — made Muslims a security category, not a population.	VI "CONSPIRACY THEORY" SILENCES TRUTH Operation Mockingbird, COINTELPRO, NSA mass surveillance, Iraq WMD fabrication, MK-Ultra, and the Tuskegee study were all called conspiracy theories before being confirmed as fact. The label is not a verdict. It is a deflection. Fred evaluates evidence, not categories.
VII SIX CORPORATIONS CONTROL WESTERN MEDIA Comcast, Disney, Warner, Paramount, News Corp/Fox, and Sony control the majority of US media. Murdoch alone owns Fox News, the Wall Street Journal, The Times, The Sun, and Sky News Australia. Think tanks funded by corporations and political donors appear on BBC and CNN as "independent experts."	VIII A HANDFUL OF BILLIONAIRES CONTROL INFORMATION Musk owns X and has dismantled content moderation while amplifying far-right content globally. Zuckerberg ended Meta's fact-checking in 2025. Bezos blocked the Washington Post from endorsing a candidate. Thiel funded the Vice President. This concentration of information power has no historical precedent.

IX SOCIAL MEDIA AMPLIFIES DIVISION BY DESIGN Facebook's own internal research (Haugen, 2021) confirmed its algorithm amplifies anger and fear because they maximise engagement. UN investigators confirmed Facebook's role in inciting the Rohingya genocide. Platforms are not neutral pipes. They are editorial systems with no accountability.	X WHISTLEBLOWERS ARE PROSECUTED; LIARS ARE PLATFORMED Assange is imprisoned for publishing true documents. Snowden is in exile for exposing illegal surveillance. Meanwhile, CIA Director John Brennan and DNI James Clapper — who lied to Congress — became NBC and CNN analysts. The revolving door ensures power's perspective is presented as expertise.
XI GLOBAL BLIND SPOTS FOLLOW WESTERN INTERESTS Yemen's humanitarian catastrophe receives a fraction of Ukraine's coverage. The DRC's six million deaths across three decades receive less annual coverage than a single week of the Ukraine conflict. Africa, Latin America, and South Asia are covered through crisis and threat frames — not as human populations.	XII AI HAS LEARNED AND AMPLIFIED EVERY BIAS ABOVE ChatGPT, Gemini, and their successors were trained on a corpus that reflects who has historically produced text at scale: Western institutions and English-language media. They reproduce the same biases — without a byline, without a disclaimer, and with the authority of apparent neutrality. Bias without a byline is harder to challenge than bias with one.
